Software Engineer | Fullstack Javascript | React native | Java
Springboot | Flutter | AI Implementation
Indonesia

Ringkasan

FullStack Engineer with 4+ years of experience building scalable and maintainable web applications. Specialize in end to end development using the JavaScript/Typescript ecosystem, currently expanding my expertise into Java/Spring Boot for enterprise solutions and exploring AI automation for business process optimization. With fullstack development certifications and experience in cross-functional teams, focus on delivering high quality solutions that combine technical excellence with business value.

Pengalaman

CIMB Niaga

Software Engineer Specialist

Mei 2026 - Present (5 bulan)

Индонезия

Serving as a Software Developer on OCTOBIZ, CIMB Niaga's integrated digital banking platform an evolution of BizChannel@CIMB designed to simplify domestic and international business transactions for customers ranging from SMEs to large corporations.

Key responsibilities include:

- Building and maintaining responsive, intuitive user interfaces for OCTOBIZ's web application
- Monitoring and investigating production issues to ensure service stability and reliability for business customers
- Expanding into backend development to gain a deeper understanding of data flow and system integration

Through this role, continue sharpening my skills in building secure, scalable digital banking systems with a strong focus on user experience.
